Marketplace lending has been expanding at a blistering rate. Experts predict global online P2P lending to reach $290 billion by 2020. To keep pace with such dynamic growth, online marketplace lenders are on a reconnaissance mission for cutting-edge technology to assist them with all aspects of the lending, from loan origination and regulatory compliance to servicing and portfolio management.

Welcome to the next-generation lending operating system - **LendFoundry.**

LendFoundry is the FinTech accelerator for marketplace lending, providing end-to-end lending solutions covering loan origination, marketing, acquisition, underwriting, loan servicing and beyond.

The LendFoundry operating system empowers marketplace lenders to bypass costly tech build-outs, minimize IT infrastructure, and accelerate growth.

LendFoundry provides all of the tools lenders need to be successful, including many built-in accelerators such as the Loan Origination System (LOS) and the Loan Management System (LMS). The LOS tracks the loan from application to funding, while the LMS tracks the funding and servicing cycles. Along with these core functions, LendFoundry accelerators facilitate customer management, compliance reporting, authentication & security, marketing, and enable retrieval of all loan details through a unified search function.

Built to serve marketplace lending, LendFoundry is now the trusted platform of choice, from start-ups to enterprises, including some of today's largest online marketplace lending companies.

LendFoundry - Stay ahead of the curve with the next-generation operating system and a technology partner you count on:

- **Scalability** – A Cloud-based platform, available as a SaaS model, LendFoundry is the foundation upon which marketplace lending is growing

- **Simplicity** - Pre-packaged 'turn-key' integration with many third-party providers such as credit bureaus, bank data providers, document handlers, and marketing applications, simplifies implementation while substantially reducing integration costs

- **Intelligence** – Want insights? The LendFoundry operating system provides robust data collection, management and reporting capabilities creating a competitive advantage throughbusiness intelligence.
