

# Manage Your Loan Servicing Digitally on Cloud and at Scale

LendFoundry Loan Management Solution (LMS) helps lenders manage loan servicing digitally while offering scalability, security, speed and enhanced customer experience. Its API based design allows onboarding loans from any Loan Origination System (LOS) and serves as a system of record across multiple loan classes. You can record and track all loans, manage repayment schedules, track scheduled payments and ad-hoc payments, allocate repayments, and keep a check on delinquencies and closures.

## Happy Customers + Happy Employees + Happy You

For your customers, it acts as a self-service portal offering a single view of their loans, payments, statements and also facilitates periodic, timely communications. For your support teams, they get everything required at one place and access to dashboards to manage loan portfolios efficiently. For your business, it provides Analytics and AI tools to identify the next best upsell and cross sell opportunities.

## Make Loan Servicing a Profit Center

### BUSINESS BENEFITS

#### Happy Customers

Self-access of information and timely communications about their loans

#### New Business

Identify and close new cross-sell and upsell opportunities with AI

#### Happy Employees

Single view of a customer saves efforts in tracking and reviewing loans
