

Manage Your Lending Business Digitally on Cloud and at Scale

For your customers, convenience and speed of loan processing has become non-negotiable. They expect a paperless application process, instant approvals, same-day disbursement, and digital interface to manage their payment schedule and loan files. Lenders need a scalable and secure technology to continually deliver innovative and flexible products as well as to help them expand into new markets, customer segments, and loan types. LendFoundry, an award-winning SaaS platform, offers tools and accelerators to help lenders manage their business digitally and deliver unmatched customer experience.

Happy Employees + Happy Customers + Happy You

LendFoundry is built on cloud technology and microservices architecture, similar tech stack as used by Netflix and Amazon. It is a full-stack platform encompassing core-lending modules, Loan Origination System and Loan Servicing System, and additional new-age features around customer management, compliance reporting, authentication, security, AI-powered credit scoring and marketing. Our SaaS model minimizes the upfront, startup cost, while the AI-enabled platform identifies priority accounts, creates risk profiles, and recommends interest rates to optimize your margins. The microservice architecture ensures a seamless integration with your existing and future technology environment. The modular architecture gives you flexibility to add new capabilities effortlessly and quickly. Furthermore, it is built on MongoDB and GraphDB, making storage and retrieval super easy and programmable.

LendFoundry enables your customers to apply and manage loans digitally. It acts as a self-service portal offering a single view of their loans, payments, statements and also facilitates periodic, timely communications. This convenience and transparency makes your customers keep coming back to you. A happy customer means more referrals and repeat business!

For your IT and operations teams, they get everything required at one place, right from automated processing, borrower verification, decision making, underwriting to running account level analysis, manage portfolios, and report delinquencies. Enough reasons for your employees to fall in love with LendFoundry.

For your business, LendFoundry provides Analytics and AI tools to identify the next best upsell and cross sell opportunities. Our powerful dashboarding capabilities, built on Microsoft PowerBI, help you keep a tap on the health of the business. On top, you get API integration with 80+ leading platforms across credit bureau, fraud, ID, KYC and CRM helping you save time, cost, and efforts at every step of the process.

Scale at speed with 80+ ready API integrations across leading 3rd party platforms

Harness the power of connector based design for an ecosystem of 3rd party API integrations to enrich the application data and drive faster, better and compliant decision making.
